

In the Claims

Please substitute the following amended claims for those currently pending:

Claims 1-43. (Canceled)

44. (Currently amended) An organizer for the storage of jewelry, the organizer comprising:

a top section, the top section having a plurality of lift out drawers that are coupled to one another by at least one hinge ~~a pair of hinges~~, and a lid pivotally connected to the top section and covering the plurality of lift out drawers when the lid is in a closed position and revealing the plurality of lift out drawers when the lid is in an open position, the lid having a mirror located on an interior portion thereof, wherein the plurality of lift out drawers move independently of movement of the lid and in a direction that is substantially transverse to the direction of movement of the lid when opening or closing said lid; ~~wherein the plurality of lift out drawers has dividers located therein, the dividers being removable and adjustable to customize the interior of the drawer, and wherein the plurality of lift out drawers has a ring platform located therein; and~~

a middle section, the middle section located under the top section, the middle section having a plurality of drawers stacked one on top of the other and a pair of doors, at least one of the pair of doors including a lip formed on an inner surface of the door and an earring tree rotatably mounted to the lip, and wherein the pair of doors can be pivoted to an open position thereby exposing the plurality of drawers and the doors can be pivoted to a closed position to conceal the plurality of drawers; ~~wherein the top and middle sections are lined with an anti-tarnish cloth.~~

Claims 45-52. (Canceled)

53. (Canceled)

Claims 54-64. (Canceled)

65. (Previously presented) The organizer according to claim 44 further comprising a secret compartment.

66. (Previously presented) The organizer according to claim 65 wherein the secret compartment is located on a back of the organizer.

Claims 67-75. (Canceled)

76. (Canceled)

77. (Canceled)

78. (Canceled)

79. (Previously presented) The organizer according to claim 44 wherein at least one of the drawers of the middle section has a plurality of dividers.

80. (Canceled)

81. (Canceled)

82. (Canceled)

Claims 83-85. (Canceled)

86. (Canceled)

87. (Previously presented) The organizer according to claim 44 further comprising a necklace bar located on an inner surface of the door of the middle section.

Claims 88-91. (Canceled)

92. (Canceled)

93. (Canceled)

94. (Canceled)

95. (New) The organizer according to claim 44 wherein at least one of the plurality of lift out drawers includes dividers located therein, the dividers being removable and adjustable.

96. (New) The organizer according to claim 44 wherein at least one of the plurality of lift out drawers includes a ring platform located therein.

97. (New) The organizer according to claim 44 wherein the top and middle sections are lined with anti-tarnish cloth.

98. (New) An organizer for the storage of jewelry, the organizer comprising:

a front wall and a back wall and two side walls extending between the front and back walls and a bottom wall extending between the front and back walls and the two side walls;

a top compartment enclosed by a portion of each of the front wall, the back wall and the two side walls;

a lid pivotally attached to the organizer adjacent to a top of the back wall so as to pivot between a closed position, enclosing the top compartment, and an open position, exposing at least a portion of the top compartment;

a first upper drawer enclosed within the top compartment by the lid in the closed position and being disposed above one of the two side walls when the lid is in the open position and being extendable out from the compartment only when the lid is in the open position such that a portion of the first upper drawer may extend laterally past the one of the two side walls;

a lower drawer disposed below the top compartment and slideably engaged by the organizer to slide approximately parallel to the bottom wall of the organizer into and out from of the organizer through an opening in the back wall, the lower drawer having a depth generally defined by a distance from an outer wall of the drawer to an inner wall of the drawer, the depth being shorter than a depth of the two side walls; and

a secret compartment bounded by the front wall of the organizer and the inner wall of the lower drawer when the lower drawer is fully inserted within the organizer.

99. (New) The organizer according to claim 98 further comprising:

a second upper drawer moveably coupled to the first upper drawer; and

wherein the second upper drawer is enclosed within the top compartment, being disposed above the first upper drawer, when the lid is in the closed position; and

the second upper drawer is extendable out from the compartment only when the lid is in the open position such that a portion of the second upper drawer may extend laterally past the one of the two side walls and past the first upper drawer.

100. (New) The organizer according to claim 99 wherein the second upper drawer is coupled to the first upper drawer by at least one hinge.

101. (New) The organizer according to claim 99 wherein the second upper drawer is coupled to the first upper drawer by a sliding track interface.

102. (New) An organizer for the storage of jewelry, the organizer comprising:

a front wall and a back wall and two side walls extending between the front and back walls;

a top compartment enclosed by a portion of each of the front wall, the back wall and the two side walls;

a middle section located beneath the top compartment and including a pair of doors hinged to and opening out from the front wall;

a lid pivotally attached to the organizer adjacent to a top of the back wall so as to pivot between a closed position, enclosing the top compartment, and an open position, exposing at least a portion of the top compartment;

a first upper drawer moveably coupled by at least one hinge to the organizer adjacent at least one of the front and back walls and enclosed within the top compartment by the lid in the closed position; and

a second upper drawer moveably coupled to the first upper drawer by a sliding track interface, and being disposed above the first upper drawer and enclosed within the top compartment by the lid in the closed position;

wherein the first upper drawer and the second upper drawer are extendable out from the upper compartment only when the lid is in the open position such that the first upper drawer may extend above one of the two side walls, a portion of the first upper drawer may extend laterally past the one of the two side walls, and a portion of the second upper drawer may extend laterally past the one of the two side walls and past the first upper drawer.

103. (New) The organizer according to claim 102 further comprising:

a bottom wall extending between the front and back walls and the two side walls;

a lower drawer disposed below the top compartment and slideably engaged by the organizer to slide approximately parallel to the bottom wall of the organizer into and out from of the organizer through an opening in the back wall, the lower drawer having a depth generally defined by a distance from an outer wall of the drawer to an inner wall of the drawer, the depth being shorter than a depth of the two side walls; and

a secret compartment bounded by the front wall of the organizer and the inner wall of the lower drawer when the lower drawer is fully inserted within the organizer.

103. (New) The organizer according to claim 102 wherein at least one of the pair of doors includes a lip formed on an inner surface of the door and an earring tree rotatably mounted to the lip.
